*This is the eighth meeting of a series of workshops for East Asian collaborations in the AGN/SMBH field. The aim of the East-Asia AGN Workshop is to foster close collaborations among scientists in the East Asia. Recently, it has been more important to strengthen and expand various collaborations in East Asia, given the great variety of accessible facilities (e.g., ALMA, JCMT, SMA, GLT, international VLBI, Subaru, and Gemini) and also in the near future (e.g., GMT, TMT, and XRISM). This workshop will provide an opportunity to learn the latest scientific results on AGN/SMBH achieved by East-Asia astronomers and to build up new collaborations among East-Asia astronomers.*

## Science Organizing Committee

Minfeng Gu (Shanghai Astronomical Observatory)  
Minjin Kim (Kyungpook National University)  
Tohru Nagao (Ehime University)  
Hung-Yi Pu (National Taiwan Normal University)  
Atsushi Tanimoto (Kagoshima University)  
Keiichi Wada (Kagoshima University)  
Wei-Hao Wang (Academia Sinica Institute of Astronomy and Astrophysics)  
Jong-Hak Woo (Seoul National University)  
Yongquan Xue (University of Science and Technology of China)

## Local Organizing Committee

Keiichi Wada (Kagoshima University: Chair)  
Shunsuke Baba (Kagoshima University)  
Takuma Izumi (National Astronomical Observatory of Japan)  
Atsushi Tanimoto (Kagoshima University)

国立大学法人  
**鹿児島大学**  
KAGOSHIMA UNIVERSITY

国立天文台  
**NAOJ**  
National Astronomical  
Observatory of Japan
